

AVAILABLE IN 12 LANGUAGES  
Arabic, Chinese, English, French,  
German, Hindi, Italian, Japanese, Korean,  
Portuguese, Russian, and Spanish.

We are excited to share with you Brightline 10 guiding principles for turning great ideas into real results. It is our sincere hope that Brightline's principles will prove useful to you as you pursue your goals.

These principles are for us both a moral rule and a basic truth. Practices can change, business models are disrupted, technology evolves, but principles do not change. They are the soul of strategy design and delivery. No matter the conditions of the organization's environment, no matter how complex and challenging its strategic goals, its principles endure.

We have crafted this set of guiding principles to help leaders close the costly and wasteful gap between strategy design and delivery. The Guiding Principles are available in 12 languages: Arabic, Chinese (Simplified), English, French, German, Hindi, Italian, Japanese, Korean, Portuguese, Russian, and Spanish.

They safely guide leaders and teams toward the right decisions, practices, and processes. They enable organizations to counter threats and seize opportunities for the implementation of strategic initiatives and the realization of strategic goals.

The principles were developed by a group of experts, practitioners, and researchers, supported by the Brightline team, who met to discuss the most complex challenges that organizations confront when they try to integrate strategy design with delivery.

If we want to make our dreams of a better world come true, we need to understand that the line that connects strategy design and delivery is blurred. Let's replace it with a bright line!

A handwritten signature in black ink that reads 'Ricardo Viana Vargas'.

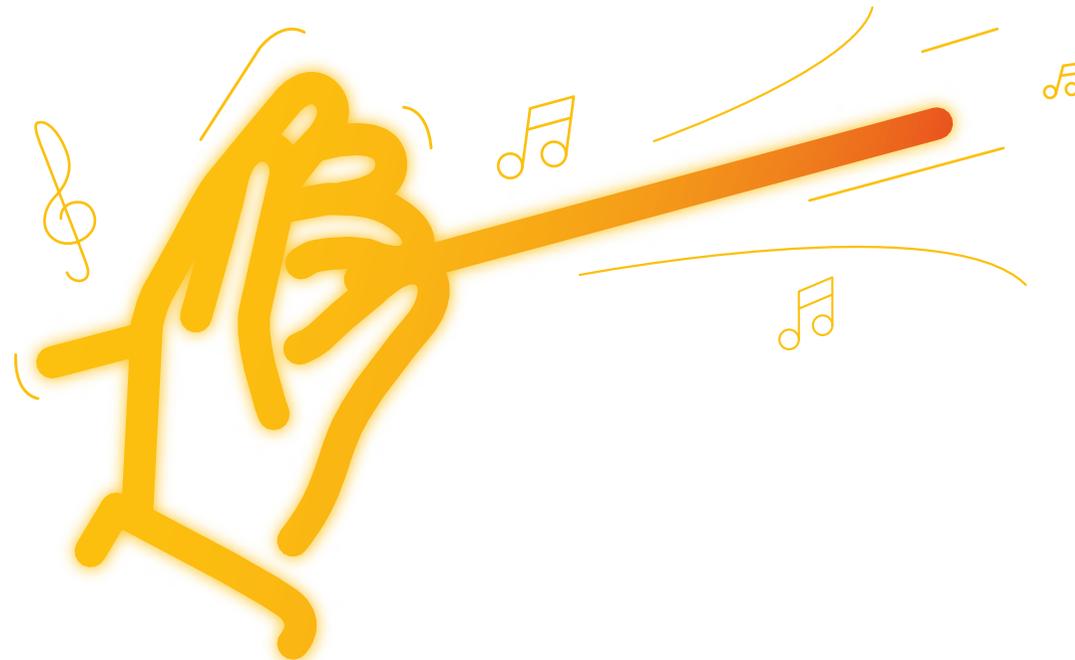

Ricardo Viana Vargas  
Executive Director

## 1 — Acknowledge that strategy delivery is just as important as strategy design.

Strategy delivery doesn't just happen automatically once it is designed! ✓ The importance of active and visible leadership cannot be overstated. You invest substantial resources, creative time, and energy in designing the right strategy. ✓ You need to

give equal priority and attention to delivering it — before you move on to something else. ✓ It's an essential part of your role to ensure that your organization has the program delivery capability it needs to implement your strategy.

## 2 — Accept that you're accountable for delivering the strategy you designed.

Do not underestimate entropy! — The orchestration required to succeed in today's fast-changing and complex business environment is enormous. — Once you have defined and clearly communicated the strategy, your responsibility shifts to overseeing the progress of implementation so that the strategy delivers results and achieves its

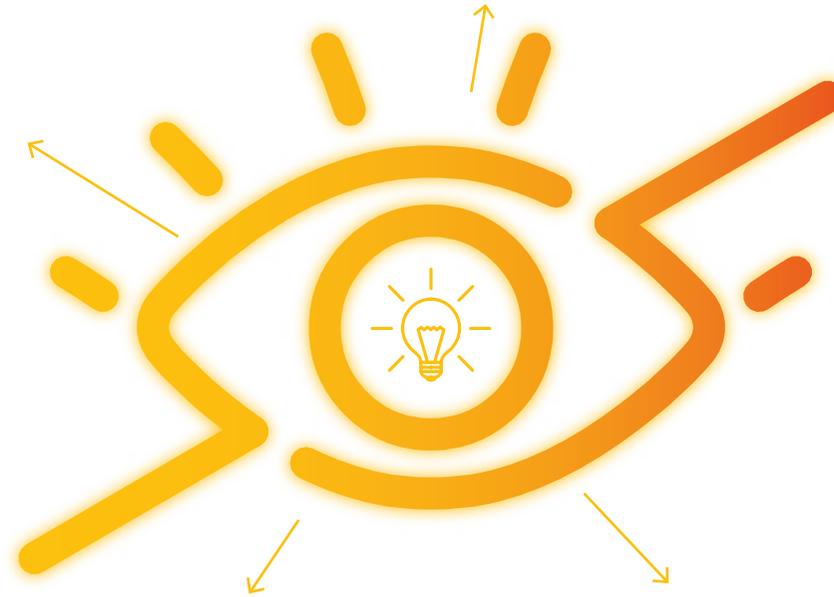

goals. You need to know where in your organization change happens and who manages the programs that drive that change. — You are accountable for proactively addressing emerging gaps and challenges that may impact delivery. Without this discipline, rigor, and care, your strategy has little chance of success.

### 3 — Dedicate and mobilize the right resources.

Inspire and assign the right people to get the job done! /  
Actively balance “running the business” and “changing the business” by selecting and securing the right resources for each — they often have different needs. / Recognize that

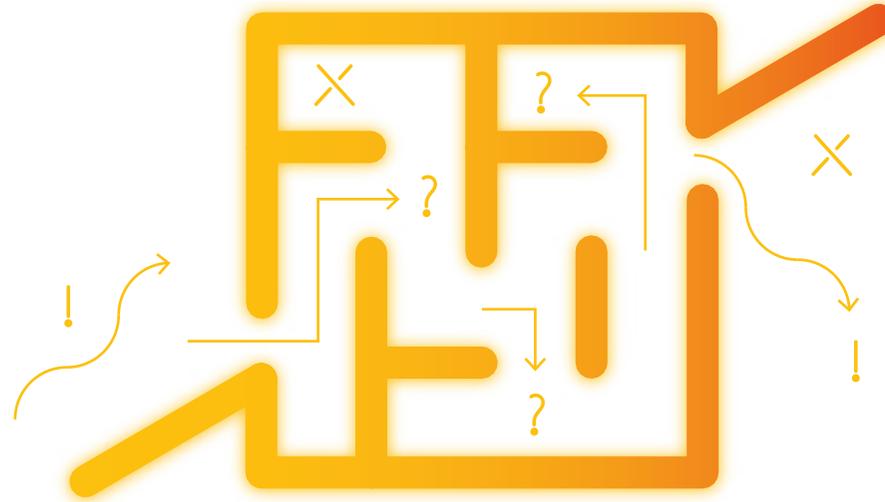

team leadership skills are at a premium, and assign the best leaders with sufficient capacity to tackle head-on the most challenging programs and those essential for successful strategy implementation.

## 4 — Leverage insight on customers and competitors.

Don't forget to look outside! — Continue to monitor customer needs, collect competitor insight, and monitor the market landscape for major risks, unknowns, and dependencies. — Advantage in the market flows to

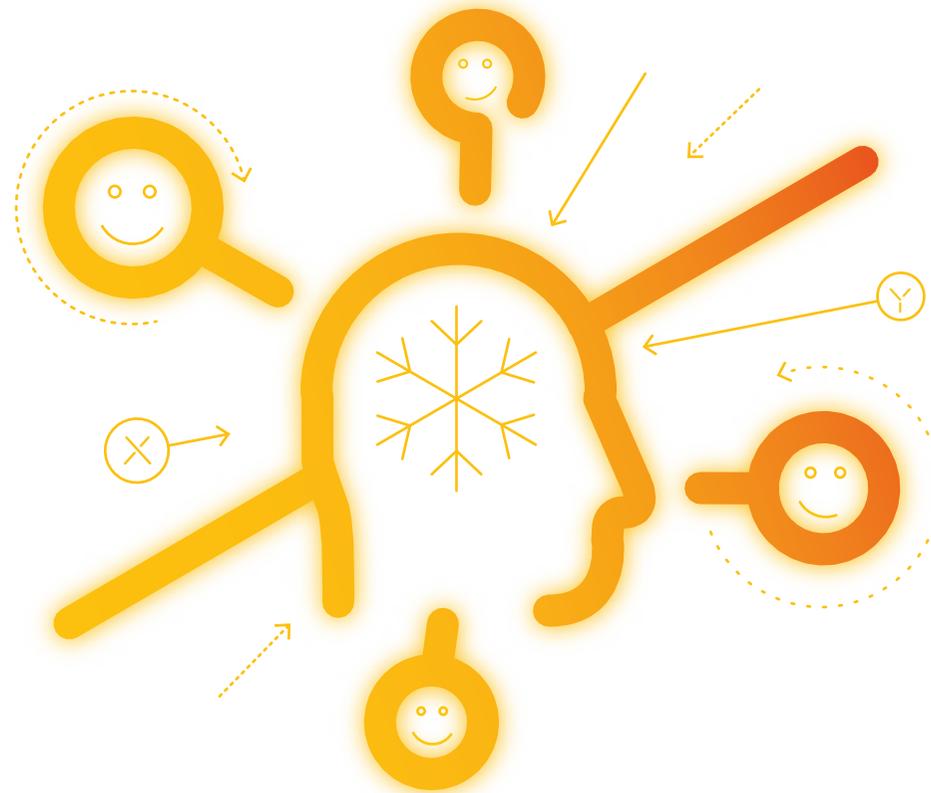

those who excel at gaining new insights from an ever-changing business environment and quickly responding with the right decisions and adjustments to both strategy design and delivery.

## 5 — Be bold, stay focused and keep it as simple as possible.

Encourage smart simplicity! — Initiating or rapidly reacting to dramatic changes in the business environment is an increasingly important capability for success. — Many of the delivery challenges you will face will be complex and interdependent. In the face of this, the best way to remain nimble is to surround yourself with simplifiers rather than complicators. — You need people who can get to the core

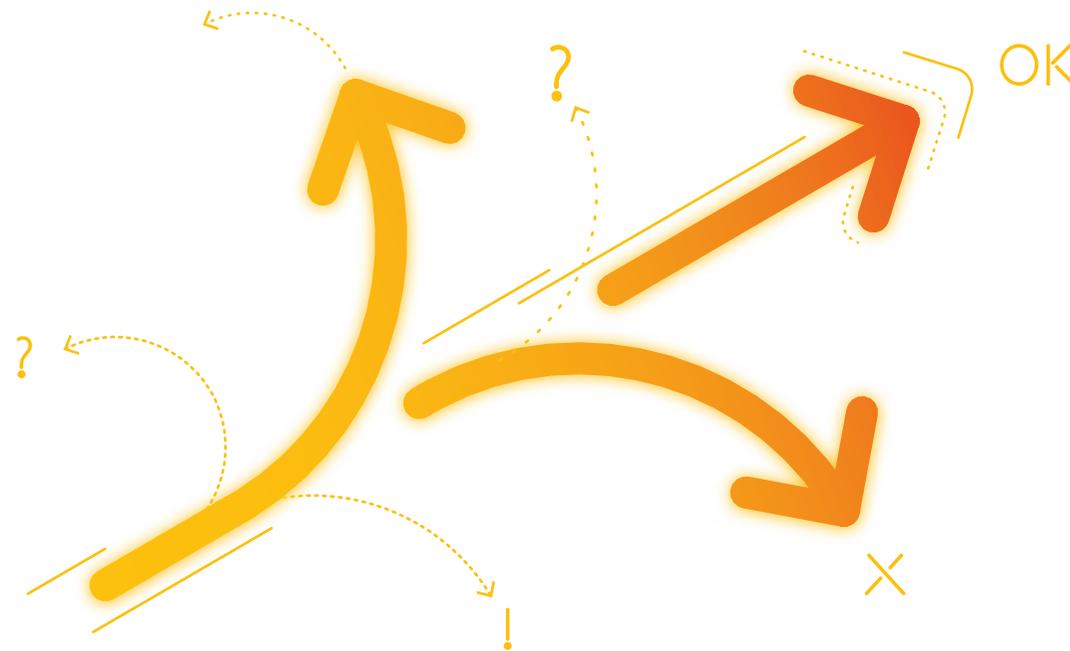

of an opportunity or threat, understand the drivers, deliver the information, and take the action you need in the way you need it. That way, you minimize bureaucracy, explore ideas, take appropriate risks, prioritize work, ensure accountability, and focus on delivering value through your strategic initiatives.

## 6 — Promote team engagement and effective cross-business cooperation.

Beware of the “frozen middle!” — Gain genuine buy-in from middle and line managers by engaging and activating them as strategy champions rather than just as managers and supervisors. — Don't just assume your people will “get it” — leadership must

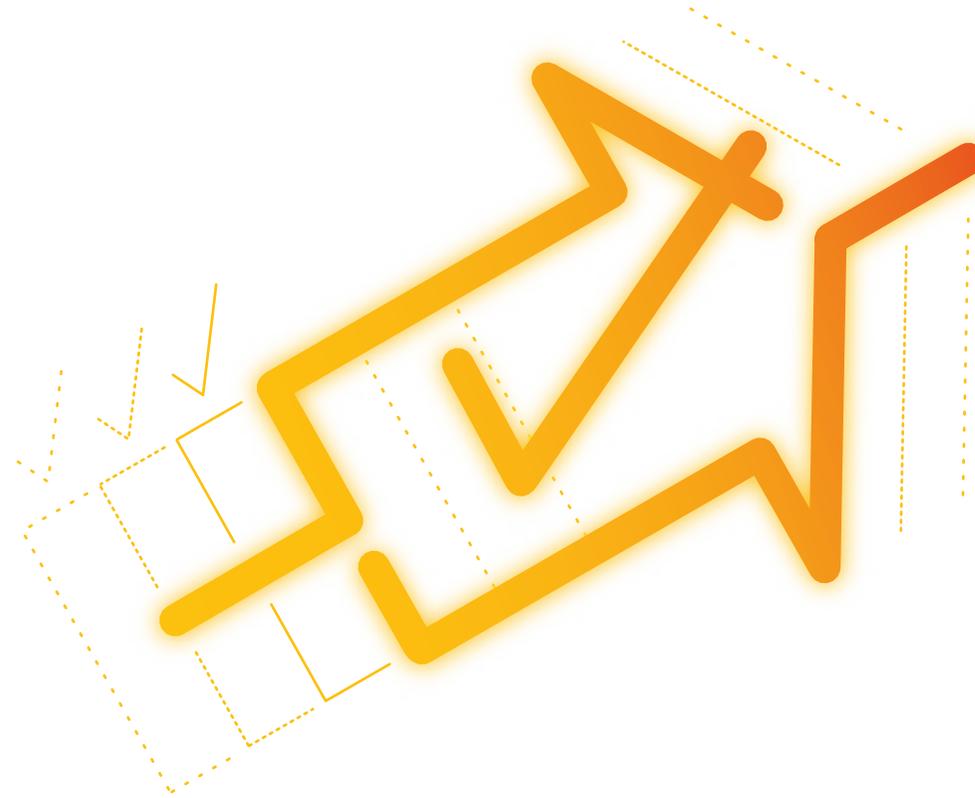

firmly establish a shared commitment to strategy-delivery priorities and regularly reinforce it. — This isn't the time or place for subtlety. Govern through transparency to engender trust and enhance cross-business cooperation in delivery.

## 7 / Demonstrate bias toward decision-making and own the decisions you make.

Follow your decisions through to delivery! / Commit to making strategic decisions rapidly. Move quickly to correct course, reprioritize, and remove roadblocks. / Accept that you likely won't have all the information you want, and rely on those you can trust to deliver sufficient reliable input to allow thoughtful

decisions. / Consider and address risks and interdependencies explicitly – both upfront and regularly throughout delivery. / Build a lean and powerful governance structure to reinforce accountability, ownership, and a bias towards action, based on agreed metrics and milestones.

# 8

## Check ongoing initiatives before committing to new ones.

Resist the temptation to declare victory too soon!  With the right governance, leadership, rigor, and reporting capabilities in place, you can regularly evaluate your portfolio of strategic initiatives.  Add new initiatives in response to new opportunities, but first be sure you understand both the existing

portfolio and your organization's capacity to deliver change.  Actively address any issues you discover. In the long term, strategic initiative management discipline – critical for effective orchestration of a dynamic initiative portfolio – will work only if robust assessment, support, and course correction are in place.

## 9 — Develop robust plans but allow for missteps — fail fast to learn fast.

Proper planning and preparation prevent poor performance! ✓  
The old axiom is as true as it ever was, but in today's business environment, strategy planning cycles must be more rapid, dynamic, and agile than in the past. ✓ Empower program

delivery teams to experiment and learn in an environment where it is safe to fail fast. ✓ Discuss challenges openly, and adjust the plan as needed for success. Learn to reward failure, or at least accept it as valuable input.

# 10 — Celebrate success and recognize those who have done good work.

Inspiring people is part of your job! ✓ Yes, you have to drive accountability and focus on delivery, but you also need to motivate those who do the work. ✓ Actively shape a winning culture by engaging and exciting the people responsible for delivering

strategic change programs. Celebrate successes and quick wins. ✓ Generously and publicly acknowledge those who demonstrate the leadership behaviors and program delivery capabilities that make strategy succeed, and ask them to share their experiences.

# What is *Brightline*?

Design

Delivery

**Brightline™** is a Project Management Institute (PMI) initiative together with leading global organizations dedicated to helping executives bridge the expensive and unproductive gap between strategy design and delivery.

It delivers insights and solutions that empower leaders to successfully transform their organization's vision into reality through strategic initiative management.

# BRIGHTLINE SUPPORTS

Through networking opportunities, executives can exchange experiences and advance ideas and practices related to strategic initiative management.

Brightline will give organizations the cutting-edge research and solutions they need to better implement their strategy. The emphasis on 'practice' in addition to 'thought' complements the Brightline Initiative's focus on bridging the gap between formulating a strategy and delivering it. 'Practice Leadership' may include tools such as frameworks and assessments that support executives in delivering the strategy.

Through capability building offerings – such as resource libraries, executive education programs, assessments and certifications, and publications – organizations will have the chance to further develop knowledge and expertise.
